Chief Complaint Status:pending

Followup home visit for management to prevent further decline of chronic medical conditions of schizophrenia, lumbago pain, chronic pain, insomnia, anxiety and depression. Patient complains of right hip pain and right leg pain

History of Present illness:

HPI Status:Finalized,pending

Patient is a 58-year-old AA male with multiple chronic conditions of chronic pain, anxiety, depression, insomnia and schizophrenia. Patient complains of right hip pain and right leg pain. Patient believes he has a pinched nerve but denies any recent trauma. Patient rates his pain at 7/10. Denies CP, HA , or NV.

Plan Note:

Plan Note Status:Pending

Continue same treatment plan as previous. No new medications noted this visit, medication adherence education was given to the patient , and patient educated on the benefits of low salt, low-fat, low cholesterol diet with current medical conditions. Patient was instructed to go to ER for symptoms of chest pain, shortness of breath, excessive headache, blurry vision or systolic blood pressure greater than 200. Patient encouraged to exercise daily. No labs needed this visit. The patient verbalized understanding of the above plan and was given the office number for any questions or concerns. Prognosis is fair and patient is stable.

1. Lumbago with chronic pain continue current plan
2. Anxiety, continue current plan.
3. Insomnia, continue current plan.
4. Chronic pain syndrome, continue current pain medication.
5. Depression, continue current plan.
6. Osteoarthritis with chronic pain continue current plan.

Medication refills as follows:
Norco 10/225 mg t.i.d.

Face to Face HH Plan:

Clinical Findings To Justify Home Health: Patient is homebound due to severe schizophrenia and chronic pain issues.

Certification Statement: No skilled nursing needed at this time but patient is homebound due to severe mental illness and chronic pain issues.
