Chief Complaint Status:finalized

Follow-up home visit to prevent further decline of the following chronic medical conditions of bipolar, depression, diabetes, hypertension, anxiety, insomnia, and gastroesophageal reflux disease. Patient complains of increased pain and falling.

History of Present illness:

HPI Status:Finalized

Patient is a 59-year-old African-American female in no acute distress with multiple chronic conditions of bipolar, depression, diabetes, hypertension, anxiety, insomnia, and gastroesophageal reflux disease. Patient states she has back pain and her current medication is not helping. She has fell twice. Patient started on a new pain medication. Patient also complains of constipation. She denies any chest pain, headaches or nausea/vomiting recently.

Plan Note:

Plan Note Status:Finalized

Continue same treatment plan as previous. Reviewed and continue with current medication. Medication adherence education was given to the patient. Patient was educated on benefits of low salt, low fat, low cholesterol diet with current medical issues. Patient encouraged continuing weight loss efforts via daily exercise and certain food restrictions. No labs needed this visit. The patient verbalized understanding of the above plan, and was given the office number for any questions or concern. Discussed the treatment plan with the patient. Prognosis is fair and patient is stable. Reviewed old records of the patient. Follow up appointment in 4-6 weeks.

1. Hypertension with vascular complications, continue current plan.
2. Diabetes mellitus type 2 with neuropathy, continue current plan.
3. Gastroesophageal reflux disease, continue current plan.
4. Anxiety, continue current plan.
5. Lumbago with chronic pain, continue current plan.
6. Insomnia, continue current plan.
7. Chronic pain syndrome, start Tylenol 3 t.i.d.
8. Bipolar, continue current plan.
9. Depression, continue current plan.

Medication refills as follows,

Tylenol #3 t.i.d.
D/C Tramadol.
